The Dalla Lana School of Public Health (DLSPH) at the University of Toronto invites applications for a tenure-stream or tenured appointment in Epidemiology. The appointment will be at the rank of Assistant or Associate Professor and will commence as early as July 1st, 2014.

We seek individuals a with specialization in Chronic Disease Epidemiology and strong methodological skills. The candidate will be expected to initiate and lead an independent research program of international calibre concerning risk factors for and/or the impact of recognized or emerging chronic health conditions (including but not confined to population-based outcome or mortality studies, analytic studies of potential etiologic factors, and studies relating to chronic disease prevention and control). The candidate will join a strong epidemiologic research environment, with links to a wide range of resources both within Canada and globally. An ability to initiate collaborations and work collaboratively in multidisciplinary teams is essential. Candidates should have a PhD in epidemiology or equivalent by appointment date or shortly thereafter, with a track record of research related to chronic diseases. The successful applicant will be expected to contribute to the teaching of courses that may pertain to, for example, our M.P.H. and PhD programs or undergraduate courses; and to mentor graduate students. Evidence of excellence in teaching and research are required. Salary will be commensurate with qualifications and experience.

The Dalla Lana School of Public Health, which began as one of four Rockefeller Foundation-supported Schools of Hygiene in 1927, and in 2013 became a standalone faculty of Public Health, is a regional and global leader in public health education, research and service, with the largest concentrations of academic population and public health researchers in Canada. The DLSPH has a rich history of research and training. The DLSPH is making major contributions in areas such as chronic disease, infectious disease, and genetic epidemiology; public health policy; social determinants of health and social epidemiology; global health; addictions; occupational and environmental health; and biostatistics methodological research. Research and training are conducted in a trans-disciplinary environment with collaborators throughout the University, such as its top-rated schools of medicine, nursing, engineering, law, and business; with closely affiliated government agencies; and with a wide range of global partners. The DLSPH has recently begun an ambitious program of expansion and new initiatives in the health of cities and communities, global health equity and innovation, and the integration of public health with primary care, with scholarship in epidemiology playing a key role. Details can be found by exploring the DLSPH website (http://www.dlsph.utoronto.ca/).

All qualified candidates are invited to apply online at the University of Toronto Academic Opportunities page, requisition ID: 1300850. Applications should include a cover letter, curriculum vitae, teaching dossier (including a statement of teaching philosophy), names and contact details of at least three referees, and a statement outlining current and future research interests. If you have questions about this position, please contact acadsearch.dlsph@utoronto.ca. All application materials should be submitted online. The closing date for the job is October 15, 2013 however, the search will remain open until filled.
The UofT application system can accommodate up to five attachments (10MB) per candidate profile; please combine attachments into one or two files in PDF/MS Word format. Submission guidelines can be found at: http://uoft.me/how-to-apply.

For more information on the Dalla Lana School of Public Health, please visit our website at: http://www.dlsph.utoronto.ca/.

The University of Toronto is strongly committed to diversity within its community and especially welcomes applications from visible minority group members, women, Aboriginal persons, persons with disabilities, members of sexual minority groups, and others who may contribute to the further diversification of ideas.

All qualified candidates are encouraged to apply; however, Canadians and permanent residents will be given priority.
